

# Coexistence Manager for GroupWise

Ensure GroupWise and Exchange coexistence with minimal risk

Historically, organizations have relied on Novell's GroupWise Gateway, Microsoft's 2003 Connector or SMTP routing for GroupWise and Exchange coexistence, whether during a migration or to integrate disparate environments. These coexistence methods are difficult to install, lack the level of functionality typically required, and involve considerable risk. For instance, when using these native solutions, free/busy lookups are inaccessible between platforms, recurring calendar appointments may not translate properly, GroupWise and Exchange users don't share a common directory, business productivity is disrupted, and ultimately revenue suffers.

Coexistence Manager for GroupWise maintains business productivity by ensuring interoperability between GroupWise and Exchange, Office 365 and hosted Exchange.

Coexistence Manager also mitigates the risk of disrupted messaging and communication between end users by:

- Providing free/busy lookups
- Ensuring accurate calendar scheduling, including custom recurring meetings
- Synchronizing directories between platforms

## Features

### Free/Busy Connect

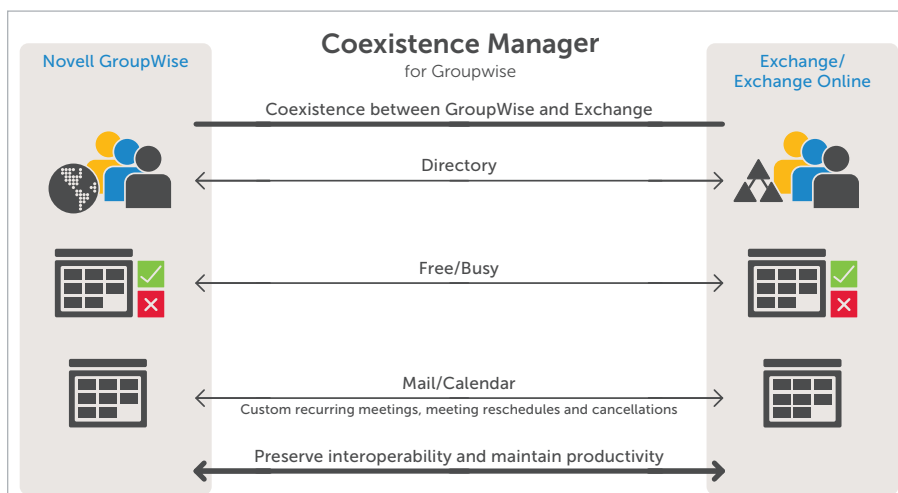

Provides free/busy lookups between GroupWise and Exchange, Office 365 or hosted Exchange. Users can view availability and schedule meetings with other users, no matter where their mailboxes reside.

### Direct Connect

Synchronizes directories between GroupWise and Exchange. Users on both platforms can view a common list of users, groups and resources.

## Benefits:

- Maintains business productivity throughout the coexistence period by ensuring that GroupWise and Exchange users can:
  - View free/busy information
  - Schedule meetings with each other
  - Share a common directory
- Mitigates risk by ensuring proper calendar scheduling between GroupWise and Exchange
- Simplifies management of the coexistence environment by enabling administrators to monitor and control Coexistence Manager for GroupWise from mobile devices
- Scales for migrations of any size
- Is backed by an experienced vendor with a track record of successful migrations and 24/7 global support

## System requirements

### GroupWise server

Novell GroupWise version 7.0.x, 8.0.x or 2012

### Exchange server

Exchange 2003/2007/2010/2013, hosted Exchange, Office 365, Live@edu or BPOS

### GroupWise Client

GroupWise client version 7.0.x, 8.0.x or 2012

### Outlook Client

Outlook client version 2003, 2007, 2010 or 2013

Outlook Web App 2007, 2010 or 2013

For a complete list of system requirements, visit [software.dell.com/products/coexistence-manager-for-groupwise](http://software.dell.com/products/coexistence-manager-for-groupwise).

### Calendar Guard

Ensures the accuracy of calendar appointments (including custom recurring meetings, reschedulings and cancellations) that are sent between platforms. GroupWise and Exchange users can collaborate and schedule meetings with each other throughout the coexistence period.

### Management console

Enables you to stay in command with real-time health and performance monitoring. You can control the operation of all installed components from one central location.

### Smart Scale

Enables you to deploy multiple instances of Coexistence Manager for GroupWise. This delivers scalability and provides for load balancing and failover.

### Remote control

Supports Mobile IT, so administrators can receive and respond to alerts, monitor performance, and control collaboration services from their mobile devices.

### About Dell Software

Dell Software helps customers unlock greater potential through the power of technology—delivering scalable, affordable and simple-to-use solutions that simplify IT and mitigate risk. This software, when combined with Dell hardware and services, drives unmatched efficiency and productivity to accelerate business results. [www.dellsoftware.com](http://www.dellsoftware.com).
