OnDemand Migration for Email

Fast, reliable Exchange migration with ZeroFOOTPRINT

With Microsoft's release of Office 365, many organizations are looking to migrate from their on-premises Exchange environments to the newest cloud platform to take advantage of the functionality and convenience that the cloud has to offer. Other organizations have already moved to the cloud but also want to migrate to Office 365. In either case, these organizations need a fast and secure migration solution.
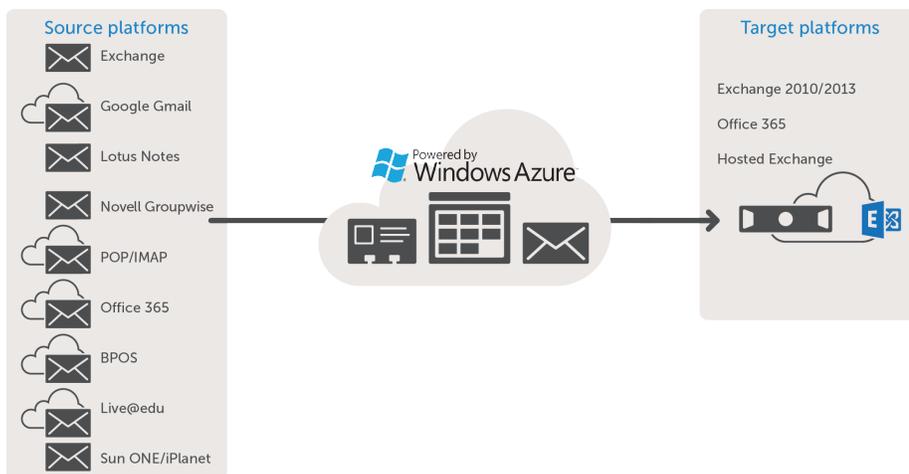

OnDemand Migration for Email securely migrates users and data to on-premises and cloud-based email platforms without requiring organizations to install or maintain any software for the move. From a single console, administrators can migrate multiple users simultaneously and move data such as email, contacts, calendars and folders in a phased approach. The tool even helps them clean up unwanted data before the migration and thereby shorten the time it takes to complete the move.

OnDemand Migration for Email is built on the Microsoft® Windows Azure platform. For migrating to Microsoft Office 365, what better tool than Microsoft's own cloud service deployment, hosting and management environment? Windows Azure provides on-demand processing power to run the migration, and none of your organization's email messages are ever stored in Windows Azure, ensuring your privacy needs are met. Available globally, OnDemand Migration for

Benefits:
- Ensures a quick, reliable and low-cost migration to Office 365/Live@edu, Exchange 2010/2013, or hosted Exchange
- Migrates some or all users simultaneously
- Migrates with no on-premises deployment needed
- Ensures the security of the organization's confidential data during the migration
- Provides pay-as-you-go options to spread the investment over time

Source platforms
- Exchange
- Google Gmail
- Lotus Notes
- Novell Groupwise
- POP/IMAP
- Office 365
- BPOS
- Live@edu
- Sun ONE/iPlanet

Powered by Windows Azure

Target platforms
- Exchange 2010/2013
- Office 365
- Hosted Exchange

Email delivers a scalable solution that can accommodate any number of mailboxes and ensures a quick, low-cost, highly secure migration.

Features

ZeroFOOTPRINT—Provides all the benefits of software-as-a-service (SaaS), eliminating the need to install or maintain a solution on premises.

Label conversion—Migrates email folders while maintaining their labels and nested structure.

Contextual help—Provides in-product help based on the screen the user is currently in, which helps ensure a smooth and simple migration process for end users.

De-duplicator—Re-migrates data without creating duplicates using a phased approach.

Keeps data secure—Ensures the security of your organization's confidential and proprietary data throughout the migration process.

Live logging—Enables you to watch the progress of each individual migration in real time, including the status and any errors that have occurred.

Data filtering—Provides the ability to filter email and calendar events by age, to exclude source email folders by name, and to change the destination folder name. These filtering options enable you to migrate only what you want, where you want it.

Mailbox authentication—Supports authentication to the mailbox via authorized administrator or service account credentials, so administrators can migrate user mailboxes without knowing or resetting user passwords. This reduces administrative effort while ensuring the security of your environment.

Multi-threaded migration—Supports multiple, simultaneous migrations from the same machine, ensuring your project completes on time.

Cloud-based forwarding—Provides automated mail routing updates in most scenarios to streamline the transition processes.

Dell Software: Delivering complete and connected solutions

Dell Software empowers organizations of all sizes to experience Dell's "power to do more" by delivering scalable yet simple-to-use solutions that can increase productivity, responsiveness and efficiency. This software, when combined with Dell hardware and services, helps customers simplify IT, mitigate risk and accelerate business results. www.dellsoftware.com.
